

Overload – Lake Erie Blue Green Algae: Problems & Solutions

The Windsor-Essex County Environment Committee (WECEC) in partnership with the Essex Region Conservation Authority (ERCA) and the International Joint Commission (IJC) has launched multiple educational resources to highlight concerns surrounding blue-green algae in Lake Erie and Lake St. Clair. An educational video entitled Overload – Lake Erie Blue Green Algae: Problems & Solutions showcases how the problem is created and what residents and landowners can do to help out. A set of ERCA factsheets on blue green algae and phosphorous were released to the public to answer frequently asked questions and provide information.

Here is a link to the video: <https://www.youtube.com/watch?v=ik0Jwb69neg>
